The Final Exam

At Wollongong University, there were four students taking chemistry and all of them had an 'A' so far. These four friends were so confident that the weekend before finals, they decided to go to Sydney and visit some friends and have a big party. They had a great time but, after all the partying, they slept all day Sunday and didn't make it back to the Uni until late Monday morning.

Rather than taking the final then, they decided that after the final they would explain to their professor why they missed it. They said that they visited friends but on the way back they had a flat tyre and found there was no spare in the car. As a result, they missed the final.

The Professor agreed they could make up the final the next day. The guys were excited and relieved. They studied that night for the exam.

The next day the Professor placed them in separate rooms and gave them a test booklet. They quickly answered the first problem worth 5 points. Cool, they thought! Each one in separate rooms thought this was going to be easy ... then they turned the page.

On the second page was written... For 95 points: Which tyre went flat?

There is no sense going on short trips anymore. It costs nearly \$2.00 a night to stay in a motel.

SPORTING SAM⁽⁴⁾ by Reg Wootton

A Brave Guy?

A rich man living in Darwin decided that he wanted to throw a party and invited all of his buddies and neighbours.

He also invited Colin, the only aborigine in the neighbourhood.. He held the party around the pool in the backyard of his mansion.

Everyone was having a good time drinking, dancing, eating prawns, oysters, from the BBQ and flirting.

At the height of the party, the host said, 'I have a 15 ft. man-eating crocodile in my pool and I'll give a million dollars to anyone who has the balls to jump in.'

The words were barely out of his mouth when there was a loud splash and everyone turned around and saw Colin in the pool fighting the croc, jabbing the croc in the eyes with his thumbs, throwing punches, doing all kinds of stuff like head butts and choke-holds, biting the croc on the tail and flipping the croc through the air like some kind of Judo Instructor.

The water was churning and splashing everywhere. Both Colin and the croc were screaming and raising hell. Finally Colin strangled the croc and let it float to the top like a dead goldfish.

Colin then slowly climbed out of the pool.

Everybody was just staring at him in disbelief.

The host says, 'Well, Colin, I reckon I owe you a million dollars.'

'Nah, you all right boss, I don't want it,' said Colin.

The rich man said, 'Man, I have to give you something. You won the bet. How about half a million bucks then?'

'No thanks... I don't want it,' answered Colin.

The host said, 'Come on, I insist on giving you something. That was amazing. How about a new Porsche and a Rolex and some stock options?'

Again, Colin said "No."

Confused, the rich man asked, 'Well Colin, then what do you want?'

Colin said,

"I want the bastard who pushed me in".

Don't worry about avoiding temptation. As you grow older, it will avoid you.

***** FROM ROLLS-ROYCE STAFF MAGAZINE *****

Sometimes it DOES take a Rocket Scientist!! (true story)..

Scientists at Rolls Royce built a gun specifically to launch dead chickens at the windshields of airliners and military jets all travelling at maximum velocity.

The idea is to simulate the frequent incidents of collisions with airborne fowl to test the strength of the windshields.

American engineers heard about the gun and were eager to test it on the Windshields of their new high speed trains..

Arrangements were made, and a gun was sent to the American engineers.

When the gun was fired, the engineers stood shocked as the chicken hurled out of the barrel, crashed into the shatter-proof shield, smashed it to smithereens, blasted through the control console, snapped the engineer's back-rest in two and embedded itself in the back wall of the cabin like an arrow shot from a bow..

The horrified Yanks sent Rolls Royce the disastrous results of the experiment, along with the designs of the windshield and begged the British scientists for suggestions.

You're going to love this.....

Rolls Royce responded with a one-line memo:

"Defrost the chicken."
